MEDICAL THERMOGRAPHY

Knowing what your body is saying
just got is easier than ever!

Non invasive
No Radiation
Painless
No body contact
All Age Appropriate
FDA Registered

THERMOGRAPHY AND ME

Thermography is a technique for detecting and measuring variations in the heat emitted by various regions of the body and transforming them into visible signals that can be recorded photographically for diagnosing abnormal or diseased underlying condition. There are multiple conditions and studies to fit everyone's needs. Here are our most common services:

AFFORDABLE QUALITY A WIDE RANGE OF STUDIES

- ❖ Our staff has received official training via American Academy of Thermology and Med-Hot Imaging. Our medical grade equipment with its superior FLIR T1030sc/A655sc 50Hz, 640x480 Radiometric Infrared Camera, the strict quality checks and staff training assures we follow standard of care guidelines for the safety and benefit of our clients.
- ❖ Although Thermography is not covered by insurance, however multiple combination that would fit everyone's budget whether you are interested in a Full Body, Health Screening or Region of Interest Study. Every report will be accompanied with a copy of the images.
- ❖ You do not have to be a client of the office or have a physician referral to undergo a study. If you have questions about your results, have option to schedule a short consultation with our staff.

REGION OF INTEREST

This includes various sections of interest to your or your health provider. For example, this may include a Thyroid Study (all 3 views), or a Head and Neck study for a Headache evaluation, or even an evaluation of an extremity or back.

Back view of patient with inflammatory arthritis

Front view of a dysfunctional thyroid gland

BREAST

Breast Study Includes images of your breasts at all angles, as well as a back view. It is a commonly combined study with thyroid study. Its FDA registered as an adjunct to Mammography and is often used in evaluation and monitoring of patient with variety of breast and hormonal issues.

Front breast view of patient with history of breast cancer

Front breast view of same patient after treatment

REFERRALS FROM HEALTH CARE PROVIDERS

Please contact our office directly to arrange for this expedited service. Providers can request specific views or full studies based on their concern. Our staff appreciates as much patient information regarding the issue at hand as this helps us be more efficient and specific with our image interpretation.

Right shoulder and elbow sports injury

Sinusitis, Periodontal disease, and Allergies
